Designs That Add Value to Spaces

2026

ABOUT US

Architecture is an art, and design is a way of life. Founded in 2018 by Architect Hande Türk, our studio is more than an architectural firm—it's a statement of vision. With boundary-breaking designs, we seamlessly merge aesthetics and functionality, transforming spaces into living art.

We continue to expand our expertise in architecture, construction, and interior design on a global scale. From the USA to Germany, the UK to Qatar and Iraq, we craft spaces that transcend borders and speak the universal language of design. Through our strategic partnership in the United States, we bring innovative and sustainable architectural solutions to life. With our Houston-based partner, we seamlessly integrate local expertise with global design trends, shaping projects that redefine excellence.

For us, every project is not just a technical structure but a fully immersive experience that leaves a lasting impact. Whether designing hotels, cafes, fitness centers, luxury villas, or residential spaces, we don't just build—we shape the future.

At Hande Türk, we offer a wide range of services, from architectural design to construction, real estate consulting to exclusive living solutions. With 3D Max visualization, 2D planning, interior and exterior projects, permit drawings, and turnkey solutions, we redefine design excellence. Our strong engineering solutions ensure the creation of durable, aesthetic, and functional structures, bringing sustainability and innovation to every project.

Our real estate consultancy guides you toward the right investment decisions, while our custom kitchen and living-space designs redefine comfort. Hande Türk is not just about building structures; we design a lifestyle.

At Hande Türk, we elevate trust, quality, and aesthetics to the highest level. With 24/7 accessibility, a client-focused approach, and a relentless pursuit of perfection, we bring your visions to life. For us, architecture is not just about constructing buildings—it's about breathing life into spaces.

Break the boundaries of design with Hande Türk.

Modernity Hotel

Eskişehir

The renovation, detailing, and design of all rooms in a 99-room hotel were completed, followed by the implementation phase. The procurement and installation of all products, including wet areas, were carried out. Additionally, the restaurant area was designed and built from scratch, including the façade and signage works. All lighting fixtures were designed by us and individually manufactured in our workshop.

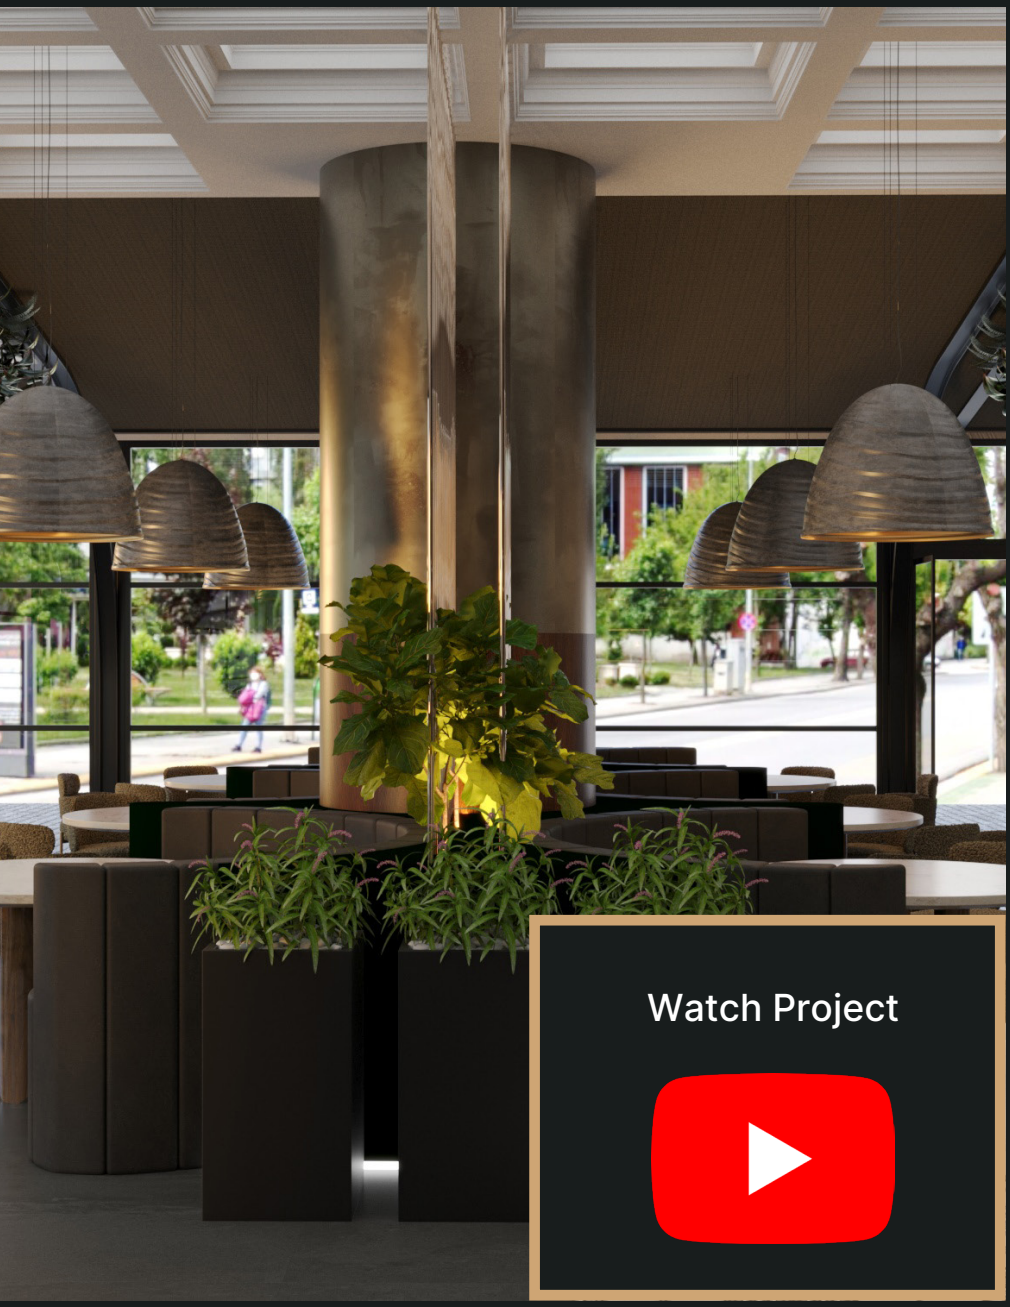

5

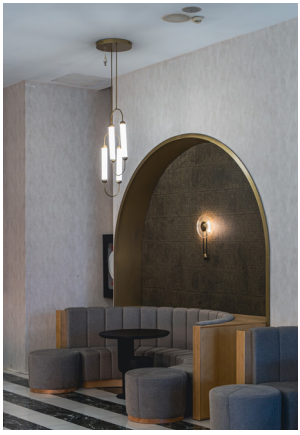

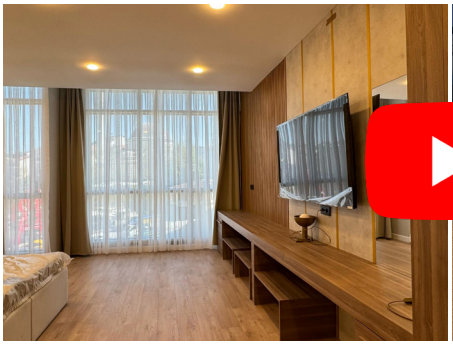

Kemercity Hotel

Eyüpsultan / Kemerburgaz

The design and implementation of our hotel project, which we are currently progressing rapidly, are being carried out under the signature of Architect Hande Türk. Although the project is still ongoing, we have managed the entire process of a commercial building composed of four independent units. Initially, we developed a hotel project with 14 different room types. While designing the rooms and other details of the project, we simultaneously designed the exterior façade as well. The façade design and its implementation were also completed.
In our hotel project, we have a reception unit, a rooftop restaurant area, a rooftop executive office area, and common restroom facilities. Along with these areas, all aspects of the 14 rooms — including flooring, curtains, doors, wet areas, and sanitary ware — were fully designed and implemented by us

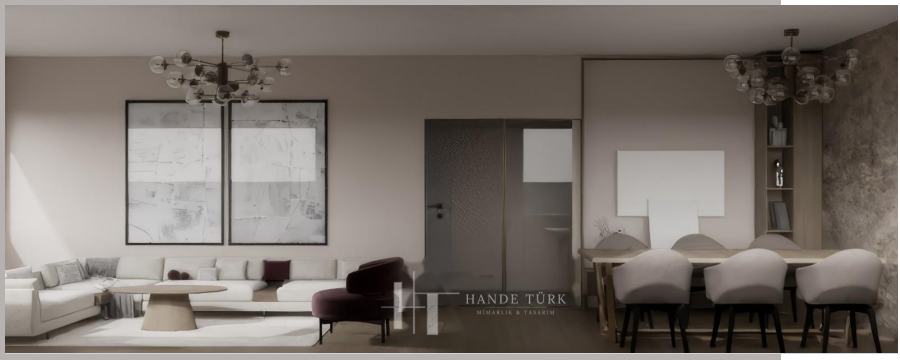

Rumeli Hisarı

İstanbul

A turnkey project we took over, including underfloor heating. It is a project where we undertook the entire renovation, decoration, design, and implementation works, as well as all electrical installations. In addition, we designed and produced the furniture, and redesigned and implemented all elements, including the joinery.

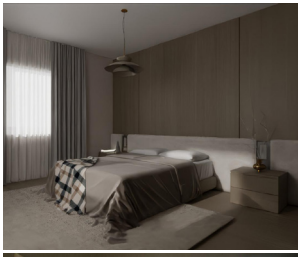

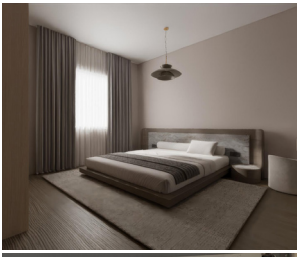

HANDE TÜRK

MİMARLIK & TASARIM

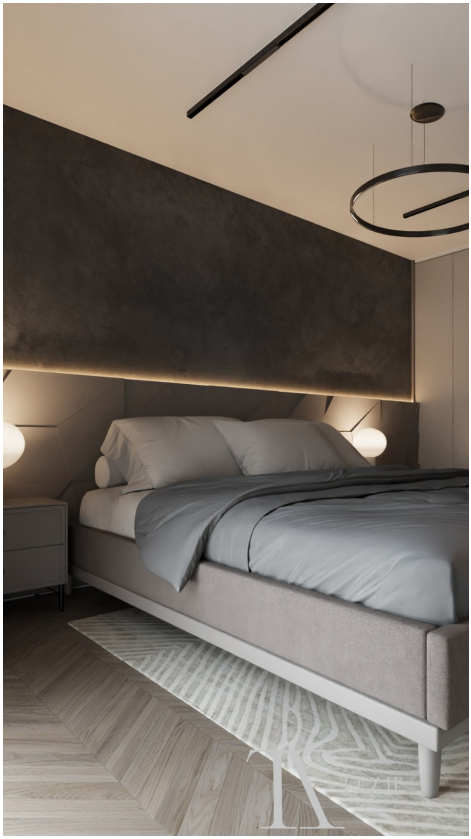

Mai Residence

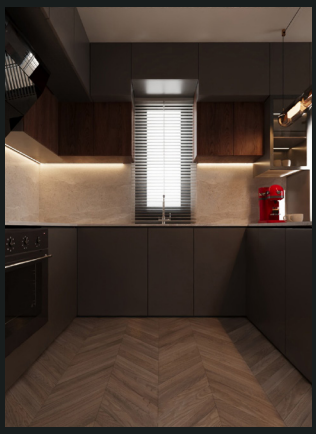

İstanbul / Kartal

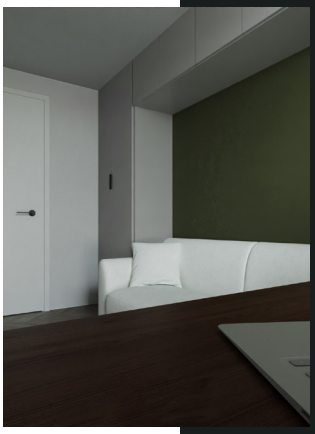

At the request of our client, we first carried out the as-built survey of the apartment. Following this stage, we prepared a 2D layout and held a meeting with our client to discuss the apartment's spatial arrangement. After finalizing the agreed layout plan, we created a modern and comfortable 3D design, taking into account all the client's needs and priorities. Through this 3D work, we dimensioned the layout and illustrated all details — including colors, textures, cabinet doors, flooring details, and more — delivering a fully applicable project design to our client.

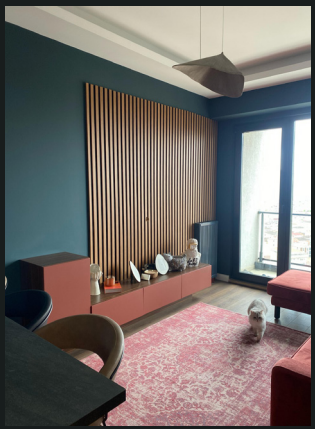

FRESH
START

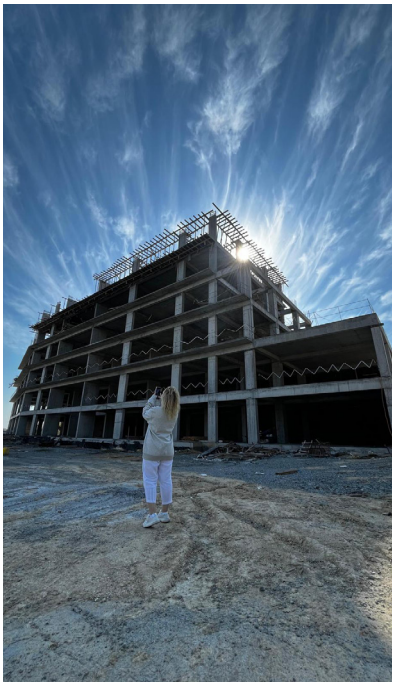

Taşoluk

Arnavutköy

For the shell construction of this project, we reached an agreement with our contractor. We took over the project when it was still an empty plot of land. All subsequent processes, including excavation, were managed by our firm. In the following stages, based on the requested revisions, the Renovation Project was drawn up by us, and the municipal and building inspection processes were also managed and finalized under our supervision.
All installation works — including mechanical, electrical, rough, and fine construction — are being carried out by our company, and approximately 3 to 4 months remain until the project's delivery.

Permit Project for Plot 11, Block 415

İstanbul / Kemerburgaz

The preparation of the permit project, the complete management and follow-up of all municipal approval processes, the development of 3D design works starting from the concept development phase for the apartment interiors, the design and implementation of the façade with an original approach, the execution of a certain portion of the shell construction, and the undertaking of site management duties were all carried out entirely under the responsibility and supervision of our firm.

17

Rough Construction Plot 7, Block 541

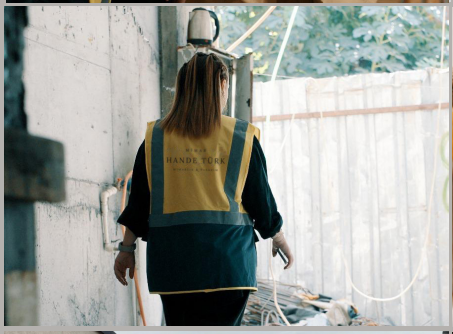

İstanbul / Kemerburgaz

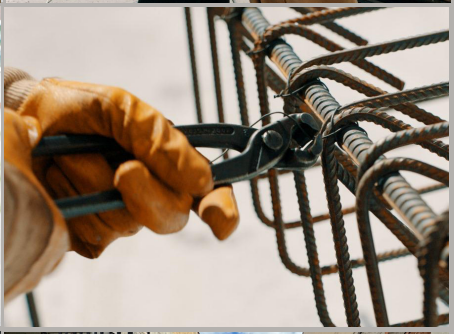

The preparation of the permit project, the complete management and follow-up of all municipal approval processes, the design and implementation of the exterior façade with an original approach, the execution of a certain part of the shell construction, and the undertaking of site management duties were all carried out entirely under the responsibility and supervision of our firm.

19

Germany Flat Design

Following our online meetings with our client, we began by commissioning a detailed as-built survey to develop the 2D drawings of the project. Based on the survey results, we created the layout plan and, after conducting meetings and making the necessary revisions, finalized the spatial arrangement. Once we thoroughly understood our client's priorities and design preferences, we carried out the 3D design work, completing the project in a way that makes the entire apartment fully ready for implementation from A to Z. We delivered the finalized layout plan with production measurements, along with the 3D design, to our client.

NETFLIX

Cafe Restaurant Project

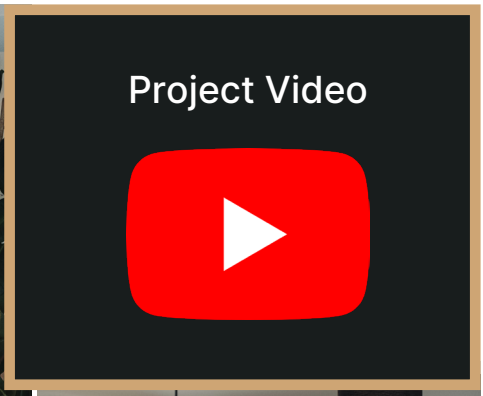

Yalova

Our Yalova project consists of three separate parts.
With our client, we worked on their villa as a turnkey project, including both the structural construction and all interior finishing works.
In addition, we completed the turnkey delivery of their 15-room guesthouse.
Following that, we designed and implemented the café-restaurant section of their hotel.
We are also presenting all other project details to you in separate files.

Project Video

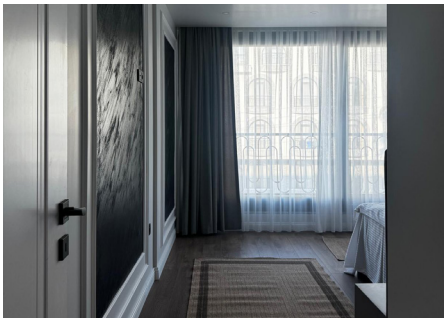

Yalova Guesthouse Project

Our Yalova project consists of three separate parts.
For our client, we completed the villa as a turnkey project, including both the structural construction and all interior finishing works.
Additionally, we delivered a 15-room guesthouse on a turnkey basis.
Subsequently, we designed and implemented the café-restaurant section of their hotel.
We are also providing all other project details to you in separate files.

Villa Design and Implementation

Yalova

Our Yalova project consists of three separate parts.
Together with our client, we completed the villa as a turnkey project, including both the structural construction and all interior finishing works.
In addition, we delivered a 15-room guesthouse as a turnkey project.
Following that, we handled the design and implementation of the café-restaurant area of their hotel.
We are also presenting all additional project details to you in separate files.

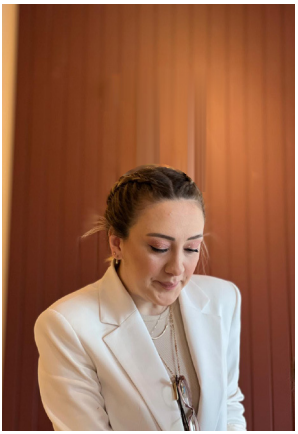

Kemerburgaz Store

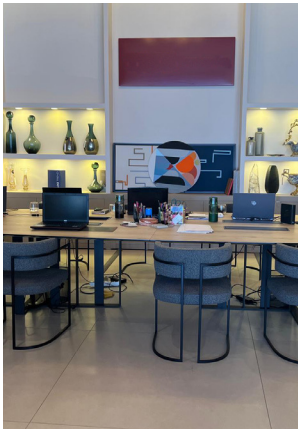

At Hande Türk, we designed our Kemerburgaz store and office from A to Z. For years, the space welcomed our valued clients, giving them the chance to experience our own production, products and quality firsthand.

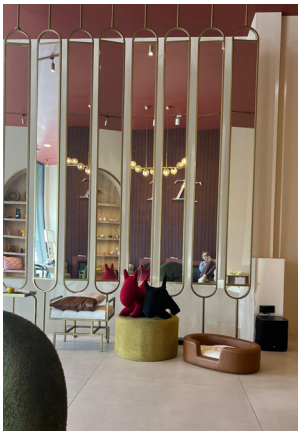

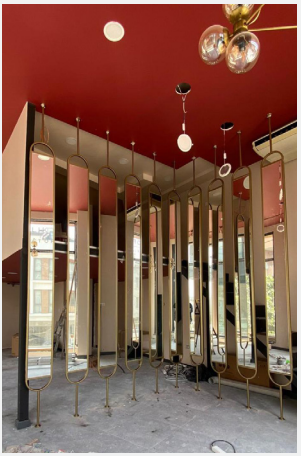

For our office project in Kemerburgaz, we designed everything from A to Z, including the infrastructure and installations, with furniture produced entirely in-house. The space, where clients could experience the quality of our products firsthand, is among our completed projects.

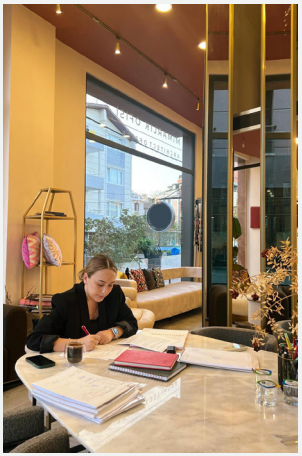

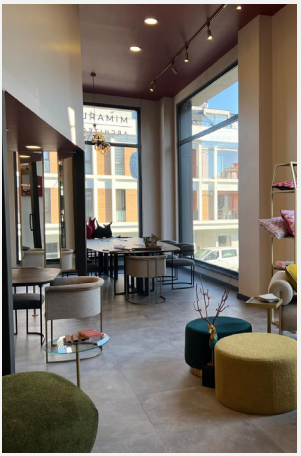

HANDE TÜRK

MİMARLIK & TASARIM

Beşiktaş Flat Project

Our Beşiktaş project is one of the projects we carried out in collaboration with our client, from the initial site survey stage to the final implementation.
In this project, we first completed the site measurements, followed by the two-dimensional layout plan and then the three-dimensional design.
After presenting the design to our client and conducting meetings, we made the necessary revisions based on their feedback.
We then produced the finalized design in our own workshop and successfully delivered the completed project.

Yıldıztabya Flat Project

İstanbul / Eyüpsultan

Eyüpsultan Yıldıztabya project is one of the projects we carried out together with our client, from the initial site survey stage to the final implementation.
In this project, we first completed the site measurements, then developed the two-dimensional layout plan, followed by the three-dimensional design.
After holding meetings with our client, we made the necessary revisions based on their feedback.
We finalized the design and completed the production in our own workshop, successfully delivering the project.

Design and Implementation

Trabzon

At Hande Türk, we have successfully completed numerous projects not only in Istanbul but also across the country and beyond its borders.
Our Trabzon project is one of these, where we managed both the structural and interior construction, along with the exterior façade design and implementation, as well as the design and production of the furniture.

Korulife Project 2

İstanbul / Eyüpsultan

This apartment is one of our two separate projects located in the Korulife 2 complex in Eyüpsultan Kemerburgaz.
The apartment is situated on the garden floor, where we made several subtle improvements.
We first renovated the winter garden and created additional outdoor features such as a woodshed and a pergola.
Inside the house, we designed and implemented a youth room and a guest room.
All furniture designs and their production were carried out by our team.

Yakacık Villa Project

In addition to our implementation projects, we also create comfortable, modern, and feasible designs for clients who seek only design consultations.
After taking precise measurements with our dedicated survey team and considering our clients' preferences, we develop tailored design solutions.
Our Yakacık villa project is one such example.

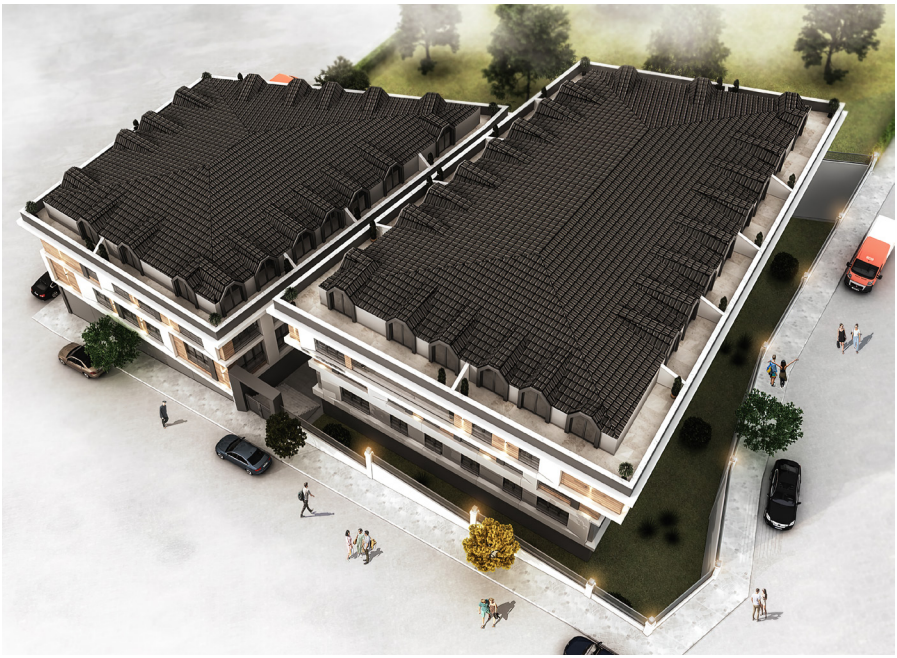

Exterior Design

İstanbul / Eyüpsultan

We designed our project in Eyüpsultan, combining sustainable living choices with Architect Hande Türk's creativity.
We undertook the 3D modeling, exterior façade applications, and much more.

For exterior façade applications, 2D modeling works, turnkey project implementations, and more, feel free to contact us!

5th Levent Residences

İstanbul / Alibeyköy

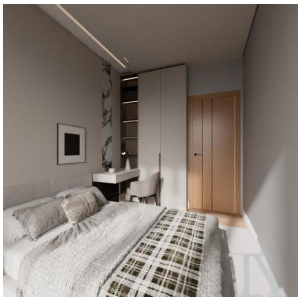

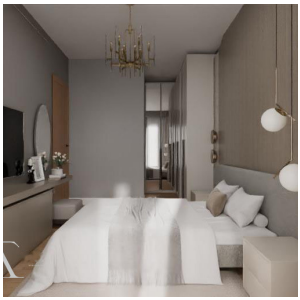

Define your luxury living preferences with Architect Hande Türk!
We handled every area within the home, from the project design stage to turnkey implementation.
Follow us for more!

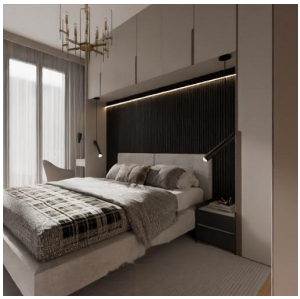

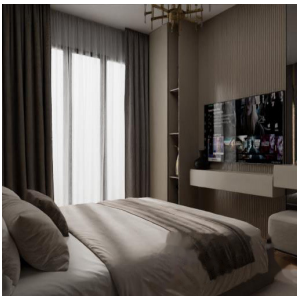

HANDE TÜRK

MİMARLIK & TASARIM

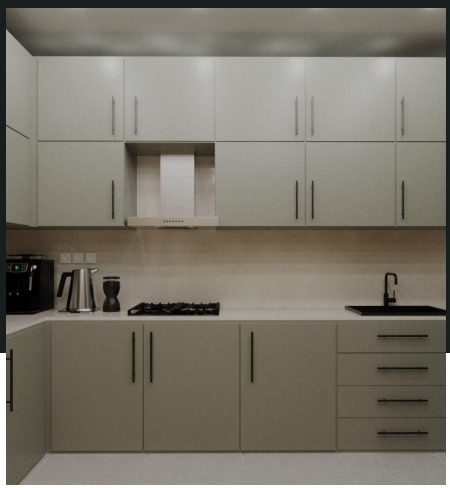

Kitchen Design

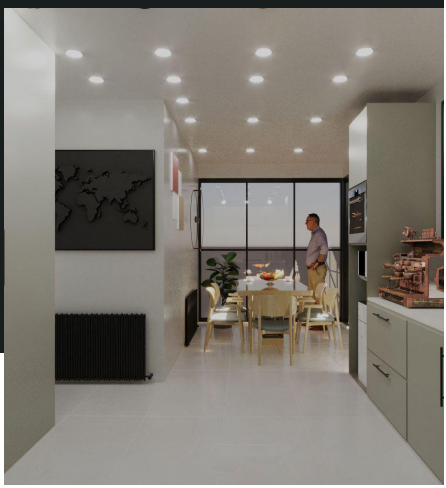

İstanbul / Alibeyköy

Our kitchen project in Alibeyköy comes to life with Architect Hande Türk's creativity. While designing the kitchen, we were inspired by efficient use of space, selecting furniture that complements the home, bright color choices, and a focus on functional living.

Flat Delivery

İstanbul / Tuzla

At Hande Türk, we have completed the handover of our Tuzla project to our client, covering every aspect from underfloor heating, flooring, electrical and plumbing installations, to the design and implementation of all furniture in line with these technical works.

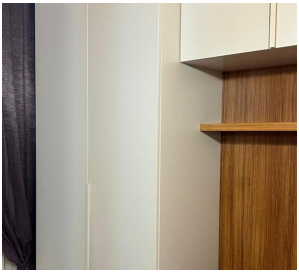

Göktürk Himm Residences

İstanbul / Eyüpsultan

At Hande Türk, we proudly present our room designs in an apartment located in Eyüpsultan.
The project includes detailed designs for the bedroom, children's room, study room, and much more.

For 3D modeling, 2D planning, custom-made materials, project development, and turnkey implementations, feel free to contact us!

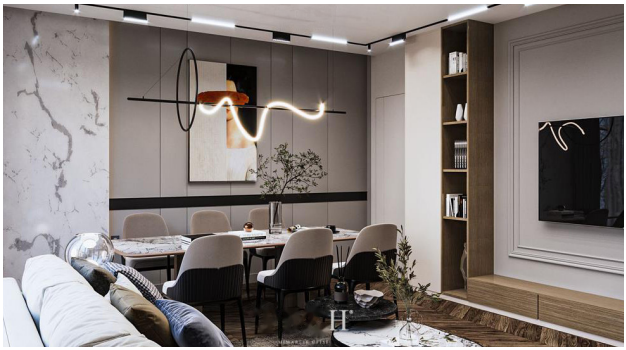

Exterior and Flat Planning

İstanbul / Eyüpsultan

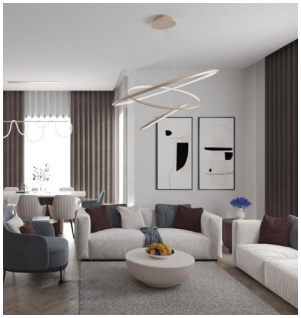

In Eyüpsultan, we planned both the exterior façade and the interior spaces of the apartment. At Hande Türk, we carry out 3D modeling, 2D planning, custom material production, project development, and turnkey implementations for both domestic and international projects.

Flat Delivery

Yalova

Our turnkey flat project in Yalova!
At Hande Türk, we carefully selected high-quality materials for every area of the home and created functional spaces with precise, millimetric planning.

For 3D modeling, 2D planning, custom-made materials, project development, and turnkey implementations, feel free to contact us!

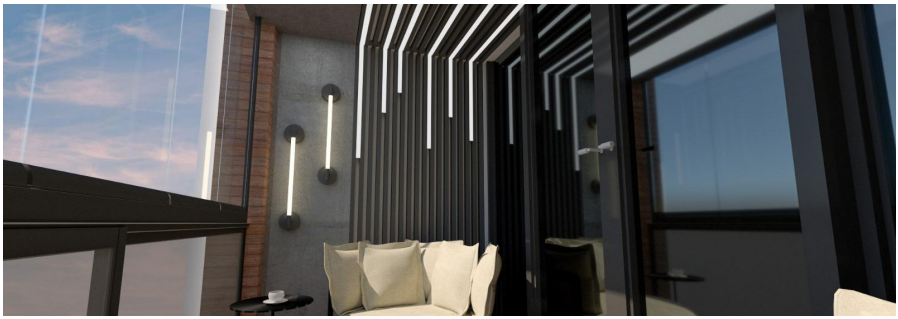

Korulife Project

İstanbul / Eyüpsultan

This apartment is one of our two separate projects located in the Korulife 2 complex in Eyüpsultan Kemerburgaz.
In this unit, we created storage areas on the balcony, designed the kitchen section, and built a cozy seating area on the front balcony where our client can enjoy tea or coffee.
Additionally, we installed a TV unit, added a console table at the entrance, and completed decorative painting works throughout the space.

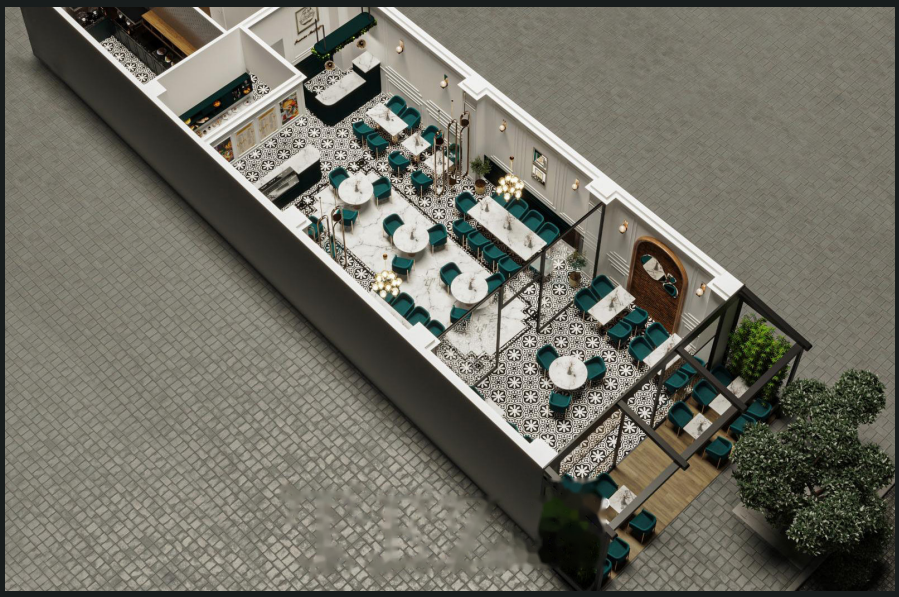

Irem’s Kitchen

İstanbul / Kartal

Explore our restaurant design created with Architect Hande Türk’s creativity.
The kitchens, seating areas, and the overall layout were carefully planned with the comfort of both customers and staff in mind.

For 3D modeling, 2D planning, custom-made materials, interior and exterior design, and turnkey implementations, feel free to contact us!

Office Design

Kocaeli / Kartepe

While designing offices, we focus not only on workspaces but also on ensuring the comfort of employees.
In our 3D designs, we prioritize quality in choices such as meeting rooms and workstations.

Social Facility

İstanbul / Alibeyköy

Our Alibeyköy social facility design is here for you.
At Hande Türk, we planned distinct areas for each floor in this project and completed its 3D design.

Rami Flat Desing

İstanbul / Eyüpsultan

Discover the Architect Hande Türk difference in our apartment designs. We detail many areas such as the living room, kitchen and bedroom in our 3D designs.

Exterior Desing

İstanbul / Alibeyköy

Our Alibeyköy social facility design is now presented to you.
At Hande Türk, we planned distinct spaces for each floor in this project and completed its 3D design.

Exterior and Flat Design

Konya

In Konya, we designed not only the exterior façade of the apartment but also its interior spaces.

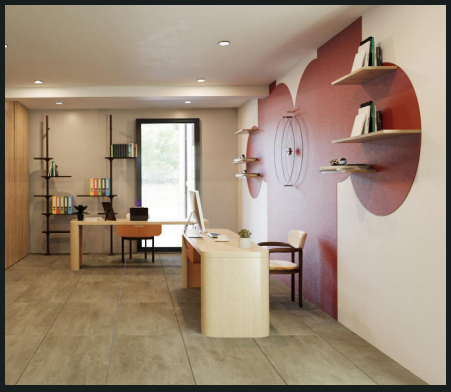

Tekstilkent Fabric Factory Design

We planned the factory spaces with modern details.
By considering the functionality of the office, meeting areas, and product display zones, we highlighted the spaces with vibrant and illuminating design elements.
Creating elegant and modern workspaces is our mission!

Sales Office Exterior Design

İstanbul / Alibeyköy

Hande Türk – Sales Office Design

Contact us for 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations!

Exterior Design

İstanbul / Tuzla

At Hande Türk, we take great pride in delivering a complete project from A to Z, including exterior façade design and implementation.
Our Tuzla project is one of our enjoyable works where we undertook the entire design process, including the exterior, and proudly left our signature.

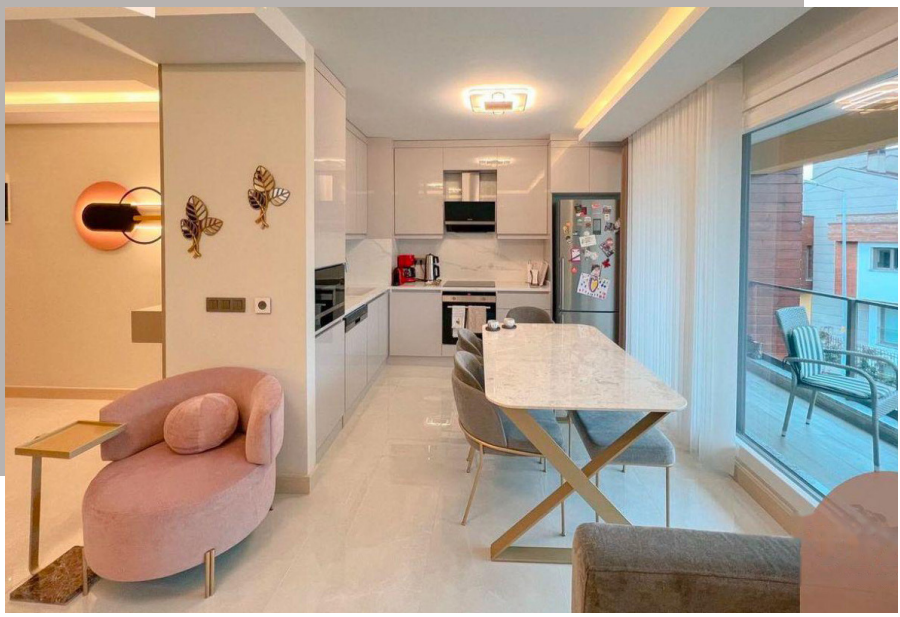

Kemerville 2

İstanbul / Eyüpsultan

This is one of our turnkey apartments where we handled both the design and all renovation works.

Tekstil Kent Office Design

A management office design was created for a denim factory in Tekstil Kent.

Kindergarten Design and Implementation

At Hande Türk, we completed the 3D project design and turnkey implementation of the kindergarten in Göktürk.

For 3D modeling, 2D planning, custom-made materials, interior and exterior design, and turnkey project implementations, feel free to contact us!

Exterior Design

İstanbul / Pendik

Hande Türk – Pendik Building Exterior Design

Contact us for 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations!

Peron Cafe

Our stylish and colorful café design in Pendik!
While designing the café, we focused on creating an enjoyable experience for both customers and staff.

Esmek Desing

İstanbul / Eyüpsultan

Hande Türk – ESMEK Design

Contact us for 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations!

Zebra Hotel Design

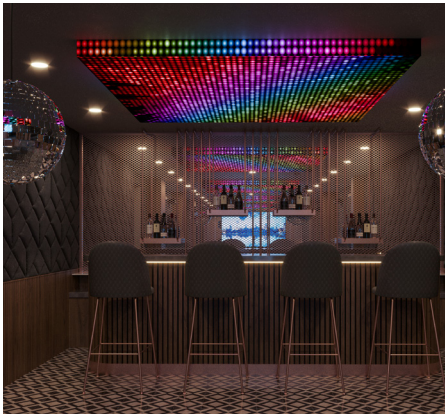

İstanbul / Karaköy

Hande Türk – Karaköy Hotel Design

In this luxury hotel project, we included the reception area, guest rooms, and facilities in our planning.
Contact us for 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations!

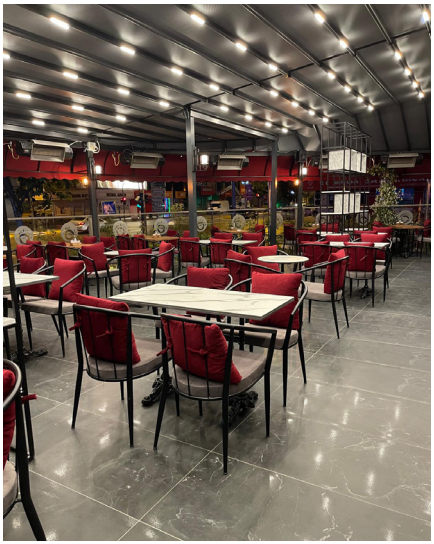

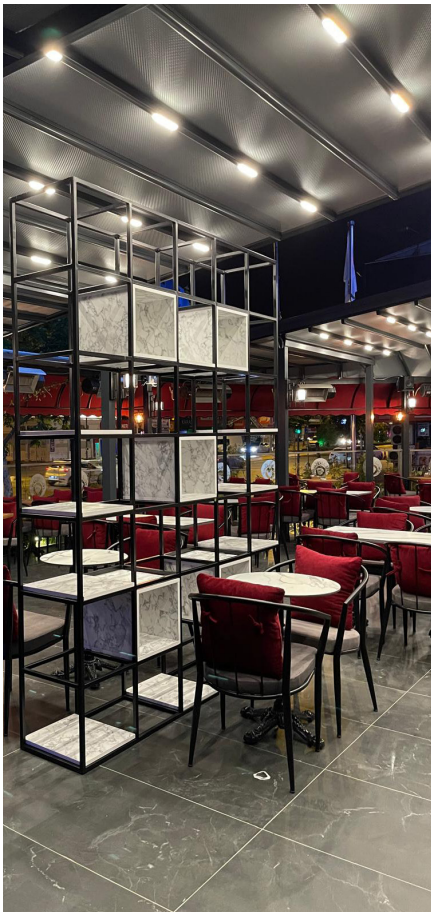

Gönül Kahvesi

Hande Türk – Gönül Kahvesi Café Project

We included our Gönül Kahvesi café project among our turnkey implementations and successfully delivered it to our client.
The café features vibrant, enjoyable spaces designed for customers to relax and have a pleasant time.
Every area was carefully detailed with the comfort of both staff and customers in mind, and we used high-quality materials throughout.

Flat Delivery

İstanbul / Kemerburgaz 1

We managed the entire process of the apartment in Kemerburgaz, from the project design stage to turnkey delivery.
Custom-made furniture, renovation works, and much more were all part of Hande Türk's services.

Flat Delivery

İstanbul / Kemerburgaz 2

Our turnkey apartment project in Kemerburgaz!
At Hande Türk, we created stunning details within minimal spaces.
We carefully maintained our approach from the design stage onward, focusing on furniture, functional living areas, and much more.

Flat Design

Bodrum

At Hande Türk, we carefully detailed many areas within the 3D designs of the Bodrum apartment, including the living room, bedroom, and more, with unique and thoughtful choices.

For 3D modeling, 2D planning, custom-made materials, interior and exterior design, and turnkey project implementations, feel free to contact us!

Flat Design

Antalya

While designing the project, we incorporated elements such as meeting rooms and workstations, choosing colors that both facilitate daily operations and appeal visually within the office environment.

For 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations, feel free to contact us!

Godiva Store Design

In our store project, we transformed product display and functional areas into elegant spaces while prioritizing the comfort of the staff.
We utilized 3D technology in our design choices to enhance the overall experience.

For 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations, feel free to contact us!

Optical Store Design

Our 3D design for the eyewear store in Bahçelievler.

For 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations, feel free to contact us!

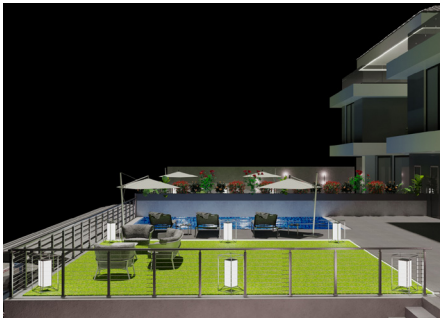

Exterior Design

We undertook the exterior façade designs of the luxury villa in Çengelköy.
We planned many details, including the garden and the building's exterior façade.

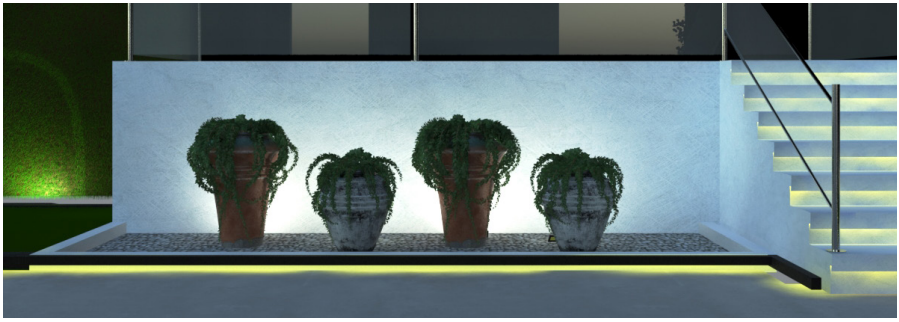

For 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations, feel free to contact us!

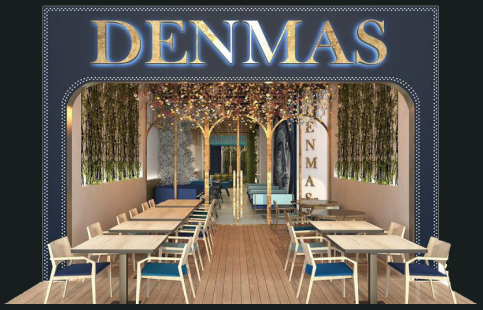

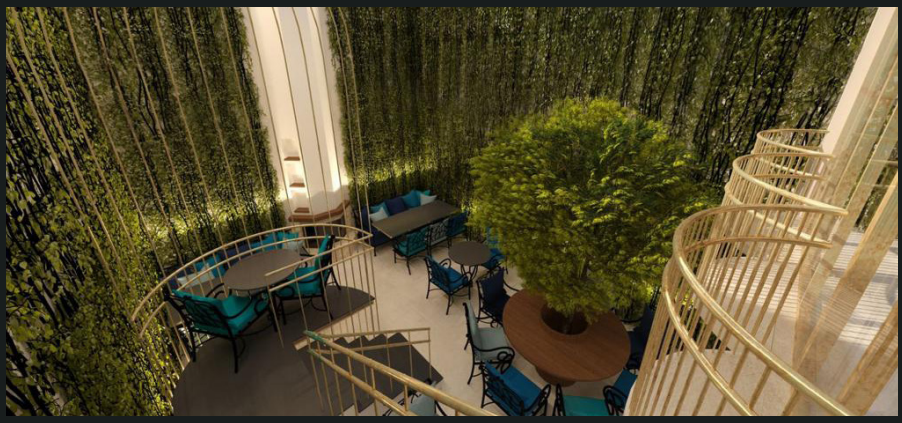

Denmas Cafe Design

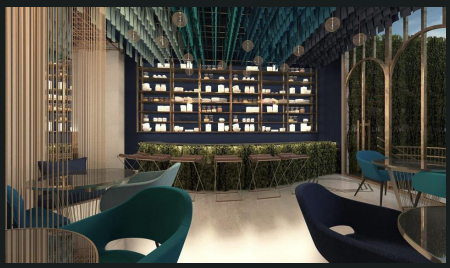

İstanbul / Nişantaşı

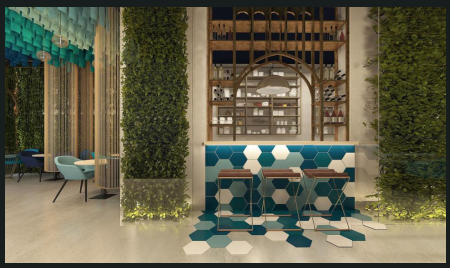

A stylish café design by Architect Hande Türk!

For 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations, feel free to contact us!

Exterior and Flat Design

In Başakşehir, we not only designed the exterior façade of the apartment but also detailed its interior spaces.
We designed areas such as the living room and bedroom.
You can explore the project details.

For 3D modeling, 2D planning, custom-made materials, interior and exterior façade design, and turnkey project implementations, feel free to contact us!

The life energy of the earth is transformed into art!

With specially designed products that appeal to both the eye and the soul, you can decorate a corner of your home, office, or garden and change its energy.

When we founded this brand, our goal was to be unique in design.

We focused on the meeting of high-quality materials with skilled hands, and we are proud to present these creations to you.

We offer both accessory-only and project + accessory consultancy services.

In kitchen projects, custom products such as ceramics, cups, and more can be specially ordered according to the client's wishes.

Most of our products are in stock, and for special productions, feel free to contact us.
